

Dear Sir:

Have you ever been on a trip and had to pass through a strange large city? Well I have. Most of these cities alert you to a AM station to tune to for highway information. 99% of the time there is nothing there but static. And try to find any information on the local airways, be it AM or FM, and you will search in vain.

XM Instant Traffic & Weather has been extremely valuable providing up to date traffic info to assist me in my travels. There service is much appreciated.
